"Patent Pending"

A video demonstrating the Splash Concept is available on our web site.

Using a sophisticated inflating device, *Splash Concept* is an advertising banner showing your corporate name and/or your message, that is carried by our technician – on foot, rollerblades (on solid surface or grass), ice skates, skis – or a vehicle – car, truck, motorcycle, boat, snowmobile, bicycle – through your selected promotional site. If needed, your corporate colors and logo can appear on clothing and all vehicles. Of course, the banner can be installed on a fixed base or support.

"Patent Pending"

The banner is available in different sizes, shapes and colors and your scripted message could go from plain text to a high-resolution image. It is the ideal tool for stadiums, race tracks, festivals, arenas, expositions and outdoor activities.
